

1. A tamper resistant bait station, comprising:
 - an enclosure for bait accessible to an animal;
 - a lid securable to the enclosure wherein a lip edge of the lid fits adjacent to a lip edge surrounding a substantial portion of the periphery of the enclosure.
2. The bait station of claim 1, further comprising a receptacle securable to the enclosure for holding material to weigh the bait station.
3. The bait station of claim 2, wherein the receptacle is removably securable to the enclosure.
4. The bait station of claim 2, wherein the receptacle is securable to the enclosure by one or more mating tongue and groove mechanisms.
5. The bait station of claim 1, wherein an upper surface of the lip edge of the lid is substantially level with an upper surface of the lip edge surrounding a substantial portion of the periphery of the enclosure.
6. A method for securing a bait station, comprising the steps of:
 - providing an enclosure for bait accessible to an animal; and
 - securing the enclosure to a receptacle for holding material to weigh the bait station.
7. The method of claim 6, wherein the receptacle is formed separately from the enclosure and affixed thereto.
8. The method of claim 6, wherein the receptacle is securable to the enclosure by one or more bolts passing through a top of the receptacle and through a base of the enclosure, each bolt threaded to receive a nut to secure the top to the base.
